

## *ReelECG™ ReelMonitor+ | ReelWearable+*

*ReelMonitor+*

*ReelWearable+*

**Real-Time** ambulatory cardiac (AECG) Monitoring System

**Wearable** excellent signal quality reduces artifact > 90+%

**Multi-Function Technology** – 24-hour Holter, Extended Holter, Cardiac Event Monitoring & Mobile Cardiac Telemetry (MCT)

**Customized Remote Data Access** for physicians & medical professionals

**Confidence** – Continuous / Full Disclosure ensure arrhythmias are reviewed by a trained professional so nothing will go undetected.

**ReelECG™** monitoring technology is a unique wearable, real-time AECG monitoring system that can perform all forms of AECG monitoring. These include 24 Hour **Holter Monitoring**, **Extended Holter Monitoring** (up to 21 days), **Cardiac Event Monitoring**, real-time **Mobile Cardiac Telemetry (MCT)** & **Remote Patient Monitoring (RPM)**. The **ReelWearable+** employs a wearable module that connects to an electrode with an integrated miniature wireless cellular module to connect the patient with ReelCardio laboratory staff & the medical provider(s). ReelCardio is an accredited ECG Laboratory known as an Independent Diagnostic Testing Facility (**IDTF**) with Medicare.
